Terracotta Mother Goddess Figurine

156 x 69 x 26 mm.

This presents a nude female figure, very simple in the body, but with much elaboration of the head. The body is given in roughest outline with a cut to mark the division between the legs, and stumps for arms. The face has a big nose and big oval, slit eyes. There is a tripartite necklace, hair braided and falling over the shoulders, while on top of the head there are three huge rosettes and other decorative features. Aressta occur but not prominently.

This comes from Baluchistan or a neighbouring area and dates to c. 3000-2000 B.C. It is a varnish type in fair condition. The nose is chipped, one/arm also, and the rosettes have sustained some damage. The figurine has been rejoined at the waist.

W. G. Lambert

010324

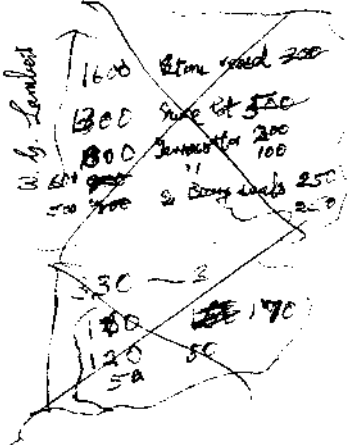

X-870

Terracotta Figurine

43 x 24 x 18 mm.

This depicts a child seated with legs up and hands resting on knees. The head has a big nose and big, round hollow eyes, and the brow is tall having apparently lost its hair.

This comes from the Indus Valley or Baluchistan and dates to c. 2500-2000 B.C. It is a small piece, perhaps meant as a toy, and in fair condition for what is left. They are not common.

Dear Postgate,
Thank you for the documents relative to next Wednesday's meetings. I note that copies of fascicle 2 of Lost Heritage were distributed at Leiden, where, unfortunately, I was not. So could I ask for one to be brought for me next Wednesday, please? Also, if you have any copies of the first one (for which I also asked long ago) I would also appreciate receiving a copy.

With many thanks,
Yours sincerely,

W. G. Lambert

WGL with compliments.

As far as I know, the only way to get Vol E, which I also have not, is through Gibson (see [ii]).

X-876

Top of Terracotta Mother Goddess Figurine

140 x 135 x 70 mm.

This is the upper part of a hollow pillar-type figurine, with applied breasts, arms, blobs for necklace, chin, nose, eyes, and plaits of hair running down the back and left of the head, the plaits also decorated with blobs.

This comes from the area where modern Afghanistan, Pakistan and China meet. It comes from a virtually unknown culture and is thus hard to date, but c. 2000-1000 B.C. may be the right range. The right breast, the arms and much of the necklace is now missing, also the nose is damaged and the head rejoined. Otherwise it is in fair condition.

010330

W. G. Lambert
